

## 2021 PNLG-PNLC Joint Learning Forum 18 November 2021 (Online)

### Rationale

Close to 3 decades of developing, implementing, verifying and demonstrating the effectiveness of integrated coastal management (ICM) in terms of socioeconomic and environmental benefits have driven the replication and upscaling covering more coastlines in the various countries in the East Asian Region with ICM and ICM-related programs and initiatives.

The replication and upscaling were made possible with the issuance of the necessary policies and supporting legislations by several countries in the region to support ICM implementation.

As ICM upscaling will continue to accelerate in the coming decade, it is critical that the next generation of coastal managers and practitioners are adept at the ICM principles, concept, framework, processes and tools to enable them to effectively carry out their tasks and contribute to achieving local, national, regional and global sustainable development targets in line with the 2030 UN Sustainable Development Goals.

### Organizers

Partnerships in Environmental Management for the Seas of East Asia (PEMSEA)  
PEMSEA Network of Local Governments (PNLG) Secretariat  
Coastal and Ocean Management Institute (COMI), Xiamen University  
Xiamen Marine International Cooperation Center

### Theme

Integrated Coastal Management implementation for the new generation of coastal managers and practitioners in the coming decade

### Platform: VooV
